

Development of sewage and water treatment system using membrane

Kim, Hyoung-Gun 김형건 Infra Division, POSCO E&C Ph.D., Seoul National University khgun@poscoenc.com

Descriptions of Research and Business Topics

- Development of MBR(Membrane Bio Reactor) system
- Development of hybrid membrane filtration system using ceramic membrane
- Using MBR, application of wastewater treatment plant
- Sewage reusing technology using membrane
- Applied to seawater desalination project using UF + RO membrane

Applications

- Sewage treatment: Gongchon sewage treatment plant(65,000m³/day)
- Water treatment : Gosan water treatment plant(Test- Bed)
- Desalination: Gwangyang seawater desalination plant(30,000m³/day)

Research and Business Fields: Sewage treatment, Water treatment, Desalination Keywords: MBR, Membranes, Reuse, Seawater desalination
